DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-8 (now claims 1, 2 and 4-8) in the paper mailed on 30 July 2003 is acknowledged. The traversal is on the ground(s) set forth on pages 5 and 6 of the response submitted on 03 November 2003. The inventions are still distinct and in view of the claim amendment submitted on 03 November 2003, the following restriction requirement is set forth as follows.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2 and 4-8, drawn to a process of making multicomponent meltblown fibers, classified in class 264, subclass 172.14.
- II. Claim 9, drawn to a nonwoven fabric, classified in class 442, subclass 361.
- III. Claims 11 and 13-15, drawn to an extrusion die, classified in class 425, subclass 463.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially

Art Unit: 1732

different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as a process including the steps of melt spinning to form filaments, attenuating the filaments by drawing with rolls, breaking the filaments by cutting the filaments with cutters or knives to form fibers and collecting the fibers.

4. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another and materially different apparatus such as an apparatus including an extrusion die having a first and second extrusion orifice (instead of a row of die orifices), or an apparatus including collecting means (for collecting the fibers).

5. Inventions III and II are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product as claimed can be made by another and materially different apparatus such as an apparatus including an extrusion

Art Unit: 1732

die for melt spinning filaments, rolls for attenuating the filaments and cutters or knives for breaking the filaments to form fibers.

6. Claims 9, 11 and 13-15 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the paper submitted on 03 November 2003.

Allowable Subject Matter

7. Claims 1, 2 and 4-8 are allowable over the prior art references presently of record.

Conclusion

8. This application is in condition for allowance except for the following formal matters:

Appropriate action with respect to non-elected claims 9, 11 and 13-15.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
